1. Specifications of the reporting files

The technical description of the files to be transmitted in the context of the AIFM reporting has been defined by ESMA and can be downloaded on their website www.esma.europa.eu (menu «Rules, Databases & Library » -> « Guidelines and technical standards » -> « Main library » -> « Sections: Fund Management & Type of document: Reference » « AIFMD - Reporting - XML documents - V1.n »). The .ZIP file contains the .XSD fields which define the .XML files to be reported. Two different types of .XML files are to be reported: the first file contains the information on the AIFM (based on AIFMD_DATMAN_V1.n.xsd), the second file contains the information on the AIF (based on AIFMD_DATAIF_V1.n.xsd).

Note that all text fields must be filled out in English.

1.1 The content of the AIFM reporting file

The different fields of the AIFM reporting are described in the definition file AIFMD_DATMAN_V1.n.xsd. In addition to the prescriptions defined by ESMA, the specifications for filling in the different fields related to the Luxembourg implementation are as follows:

Data Type	Reported Data	Comment
Reporting Member state	LU	Fixed for reporting towards the CSSF
AIFM National Code	ANNNNNNNN	AIFM identifier attributed by the CSSF: constant value "A" followed by the identification number of the AIFM (preceded by zeros when the number has less than 8 digits)

1.2 The content of the AIF reporting file

The different fields of the AIF reporting are described in the definition file AIFMD_DATAIF_V1.n.xsd. In addition to the prescriptions defined by ESMA, the specifications for filling in the different fields related to the Luxembourg implementation are as follows:

Data Type	Reported Data	Comment
Reporting Member state	LU	Fixed for reporting towards the CSSF
AIFM National Code	ANNNNNNNN	AIFM identifier attributed by the CSSF: constant value "A" followed by the identification number of the AIFM (preceded by zeros when the number has less than 8 digits)

Data Type	Reported Data	Comment
AIF national code	FMMMMMMM_ CCCCCCC	AIF identifier attributed by the CSSF: 'F' to be replaced by the constant value 'O', 'K' or 'V' followed by the identification number of the AIF (preceded by zeros when the number has less than 8 digits), « _ » (underscore) and the identification number of the compartment/sub-fund (preceded by zeros when the number has less than 8 digits, or « 0000000 » if the fund has no compartment/sub-fund
Old AIF national identifier - National code	FMMMMMMM_ CCCCCCC	see « AIF national code »
Share class national code	PPPP	The identification number of the share class (preceded by zeros when the number has less than 4 digits)
Master AIF national identifier - National code	FMMMMMMM_ CCCCCCC	see « AIF national code »

In case of correction of a previously sent data record (filing type = 'AMND'), the complete data record has to be sent again.

2. The transmission of the AIFM and AIF reporting files to the CSSF

2.1 Transmission channels pursuant to Circular CSSF 23/833

The channels to be used are those operating in accordance with the provisions of Circular CSSF 23/833. Two channels are available for this reporting:

- Application Programming Interface (API)
- External channels

2.1.1 Application Programming Interface (API)

Method of transmitting reports via Application Programming Interface can be found on our website following the link <https://www.cssf.lu/en/Document/methods-of-transmitting-reports-via-s3-application-programming-interface-technical-guidance/>

On the edesk IT management console, the "IT Expert" must create a bucket "**Reporting AIFM**".

The "**Reporting AIFM**" bucket type is only available for entities that are sender for at least one AIFM (cf. chapter 4.1).

2.1.2 External channels

Method of transmitting reports via external channels can be found on our website following the link <https://www.cssf.lu/en/Document/methods-of-transmitting-reports-via-external-channels-naming-convention/>

2.2 Sending of AIFM and AIF reporting files

Two different types of files have to be sent: one containing information about the AIFM, and one containing information about the AIF managed by the AIFM. Both are based on the .XSD model as defined in chapter 1 of annex 1.

All files are to be created in XML format (encoded in UTF-8). For the transmission, each single file has to be encoded in .ZIP format, using the same file name with the extension '.xml' replaced by '.zip'. The .ZIP file must not be password-protected (the security of the transmission is handled by the transmission channels), and each .ZIP contains exactly one .XML file. The files must comply with the following naming convention:

3. CSSF return files

The CSSF foresees three different return files for AIFM reporting:

Code	Schéma XML	Content
AIFFBR	FileAcknowledge	Standard acknowledgement of receipt
AIFFDB	n/a (ZIP file)	This type of return will be generated by the CSSF following the analysis of the file by the CSSF. This file is generated by the CSSF after: <ul style="list-style-type: none"> - the proper execution of all the automated and manual tests of the CSSF. - failure of at least one automated or manual test of the CSSF and thus the rejection of the file by the CSSF.
AIFFBH	n/a (ZIP file)	This type of return will only be generated by the CSSF if the analysis of the file by ESMA returned error messages. The ZIP file only contains *FBH* files with error messages related to the file refused by ESMA.

The return files are transmitted to the filing entities, using the naming convention (see 2).

Description of controls, error codes and error messages received in the return files to an AIFM reporting file can be found in Annex 1.

Description of controls, error codes and error messages received in the return files to an AIF reporting file can be found in Annex 2.

4. Procedure to register as a sender

4.1 Application Programming Interface (API)

If you want to submit the AIFM reporting for a reporting entity you act on behalf via API, this link must be first registered at CSSF. To do so, please send an email at edesk@cssf.lu with the following information:

- The name and CSSF identification number of the sender
 - In case of double licensing, please mention the CSSF identification number you'll use to create the bucket
- The name and CSSF identification number (A-xxxx) of the reporting entity you act on behalf
- Full name of a contact person
- Phone number of a contact person
- E-mail address of a contact person

4.2 External channels

The method to register as a sender via external channels can be found on our website following the link <https://www.cssf.lu/en/Document/methods-of-transmitting-reports-via-external-channels-naming-convention/>, in the chapter 2.3.3.

If the identifier cannot be found in this zip-file and the AIFM has already been authorised or registered with the CSSF, the AIFMs should contact the CSSF by using exclusively the email address aifm_reporting@cssf.lu .
ERR-002	The link between the sender and the AIFM does not exist in the CSSF register.				Before sending any AIFM-reporting file to the CSSF, the AIFM should inform the CSSF, if the company is the technical sender of the AIFM-reporting to the CSSF or if it delegates the submission to a third party. In this context, the CSSF requested AIFMs in its press release 15/04 to submit this information exclusively to the email address aifm_reporting@cssf.lu in

					the case the information has not already been submitted during the registration of their certificate with the CSSF.
ERR-003	A reporting file with the same filename has already been sent. FOR-001	Invalid XML format.				The XML format must correspond to the last version published by ESMA. If an AIFM submits an XML format which is not identical to the current version, the AIFM-reporting file will be refused.
FOR-004	The file is not an AIFM file				The filename corresponds to an AIFM-reporting whereas the XML format corresponds to an AIF-reporting.
