Definitions and sources

Credit - Credit data are total bank credit to Luxembourg private non-financial sector. Source: BCL

Capital ratio - The ratio of risk weighted assets and own funds, in percent. Source: ECB

Credit-to-GDP ratio - The ratio of credit and GDP over the last four quarters. Source: BCL

Credit-to-GDP gap - Deviation of the credit-to-GDP from its long time trend. The trend is calculated according to a recursive Hodrick-Prescott filtered trend of the ratio with a smoothing parameter, lambda of 400 000. Source: BCL

Euro Composite Index of Systemic Stress (CISS) - The CISS is computed for the Euro Area as a whole. It includes 15 raw, mainly market-based financial stress measures that are split equally into five categories, namely the financial intermediaries sector, money markets, equity markets, bond markets and foreign exchange markets. Higher values indicate a more stressful environment.
