Important notice

On 28 June 2014 the European Commission has published in the Official Journal of the European Union Commission Implementing Regulation (EU) 680/2014 of 16 April 2014 laying down

implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) 575/2013 of the European Parliament and of the Council.

The aim of Commission Implementing Regulation (EU) 680/2014 as amended, is to harmonise the content and format of data to be reported by European banks to their supervisors in order to comply with Capital Requirements Regulation (Regulation (EU) 575/2013 – “CRR”) and Capital Requirements Directive (Directive (EU) 2013/36 – “CRD”). It gave legal effect to the drafts implementing technical standard prepared by the European Banking Authority (EBA) regarding the form and content of the reporting templates needed by European bank supervisors.

On the 7th of June 2019, Regulation (EU) 2019/876 (“CRR2”) and Directive (EU) 2019/878 (“CRDV”) of the European Parliament and of the Council have been published in the Official Journal of the EU. CRR2 and CRDV entered into force on the 27th of June 2019, knowing that the majority of provisions will apply from 28 June 2021 onwards. Commission Implementing Regulation (EU) 680/2014 was repealed and replaced by Commission Implementing Regulation (EU) 2021/451 to align with the changes introduced by CRR2 and CRDV. Regulation (EU) 2021/451 was subsequently amended as specified in Chapter 4 Section 1.

Commission Implementing Regulation (EU) 2021/451 as amended, is part of the Single Rulebook aimed at enhancing regulatory harmonisation in the banking sector in the European Union and is directly applicable in the member states of the European Union, without legal transposition at the national level.

The CSSF has decided to publish the present document, in order to provide further guidance on the technical specifications of the reporting requirements as applicable under the CRD/CRR framework.

The EBA also provides an overview of supervisory reporting requirements, EBA reporting frameworks, under the following address:

<https://www.eba.europa.eu/risk-analysis-and-data/reporting-frameworks>

Introduction

As from January 2014 on, the reporting requirements applicable to credit institutions are laid down:

- in European regulations (e.g. Regulation (EU) 575/2013, Commission Implementing Regulation (EU) 2021/451 as amended) for some reporting areas, while
- national provisions (CSSF Circulars) continue to apply for other reporting areas (template layouts, reporting instructions, validation rules, technical specifications...).

In addition to the reporting requirements mentioned above, other regular reporting may be required by the European institutions (e.g. guidelines).

This document aims at providing an overview of the periodical reporting requirements and other regular reporting applicable to credit institutions in Luxembourg from January 2014 onwards (chapters 1-4) as well as the reporting formats and technical specifications (chapter 5).

Chapter 1 Reporting requirements applicable to Luxembourg based credit institutions

Sections 1 and 2 provide a general overview of the reporting areas governed by:

- EU regulations (Section 1)
- EBA Guidelines (Section 1)
- national provisions (Section 2).

Section 3 describes the scope of the Financial Information reporting requirements.

Section 1 Reporting areas covered by EU regulations or guidelines

EU regulations are *directly* applicable to the institutions; as a result, there will be no legal transposition at the national level of the latter.

The supervisory reporting requirements by credit institutions are regulated by Regulation (EU) 575/2013, Commission delegated regulation (EU) 2015/61, Commission Implementing Regulation (EU) 2021/451 repealing Commission Implementing Regulation 680/2014 as amended and Commission Implementing Regulation (EU) 2021/453, whereas:

- Regulation (EU) 575/2013 sets out prudential requirements for institutions which are directly applicable starting 01.01.2014;
- Commission Implementing Regulation (EU) 2021/451, provides for uniform reporting frameworks, by specifying uniform formats, frequencies, dates of reporting, definitions and IT solutions.
- Commission Implementing Regulation (EU) 2021/453 of 15 March 2021 lays down implementing technical standards for the application of Regulation (EU) 575/2013 of the European Parliament and of the Council with regard to the specific reporting requirements for market risk.
- Commission delegated regulation (EU) 2015/61 of 10 October 2014 supplements Regulation (EU) 575/2013 of the European Parliament and the Council with regard to liquidity coverage requirement for Credit Institutions.

The following areas are covered by Regulation (EU) 575/2013:

- Financial information (limited to the credit institutions subject to article 99 of Regulation (EU) 575/2013)
- Own funds requirements (Solvency)
- Large exposures
- Leverage
- Liquidity (Liquidity coverage requirements and Reporting on stable funding (NSFR))
- Losses stemming from lending collateralised by immovable property
- Asset encumbrance
- G-SII indicators (not applicable in LU)
- specific reporting requirements for market risk (FRTB reporting)

Other regular reporting:

- EBA guidelines EBA/GL/2019/05 of 9 December 2019 on harmonised definitions and templates for funding plans of credit institutions under Recommendation A4 of ESRB/2012/2
- Declaration of liquidity related products and services referred to in article 23(2) of Commission Delegated Regulation (EU) 2015/61 (LCR DA)
- Commission Implementing Regulation (EU) 2016/2070 of 14 September 2016 laying down implementing technical standards for templates, definitions and IT-solutions to be used by institutions when reporting to the European Banking Authority and to competent authorities in accordance with Article 78(2) of Directive 2013/36/EU of the European Parliament and of the Council

The reporting requirements covered by Regulation (EU) 575/2013 and the other regular reporting have to be submitted by the credit institutions in accordance to the regulations related to it **and to**

the instructions issued by the EBA in its answers within the context of the Q&A as specified in point III of the circular CSSF 2014/593 as amended.

The EBA provides an overview of supervisory reporting requirements, EBA reporting frameworks, under the following address:

<https://www.eba.europa.eu/risk-analysis-and-data/reporting-frameworks>

The objective of the EBA is to provide a comprehensive overview of the reporting requirements applicable for each reference date (including a consolidated version of the requirements and the unofficial regulatory text as well as the reporting templates and instructions).

EBA Signposting tool:

The European Banking Authority (EBA) has issued on the 2nd of May 2023 the first version of an interactive signposting tool, that aims at supporting institutions in identifying relevant modules and templates for their reporting requirements:

<https://www.eba.europa.eu/eba-makes-supervisory-reporting-requirements-easier-navigate>

The signposting tool helps institutions of different sizes and complexity identify the reporting requirements and templates that are relevant for credit institutions considering their type and the scope of activities.

The signposting tool comes in response to one of the recommendations from the June 2021 EBA Report on the cost of compliance with supervisory reporting requirements and aims at supporting banks in the compliance process, establishing a common business logic and reducing their compliance and reporting costs.

The following table provides an overview of reporting framework version releases:

Reporting framework	Framework release date	Applicable for reports as of	Main changes from previous version
3.3	From 05/2023	Module specific from 09/2023	<p>Integration of IPU reporting into DPM and taxonomy</p> <p>Integration of ESG pillar 3 disclosures into DPM and taxonomy</p> <p>Changes to MREL/TLAC reporting</p> <p>Changes to Supervisory Benchmarking</p> <p>Integration of a subset of Pillar 3 disclosure templates¹</p> <p>Integration of new advanced ad-hoc IRRBB reporting²</p>

¹ Only a small number institutions included in the pilot exercise are concerned

² Only QIS institutions are concerned

3.2	From 12/2021	Module specific from 09/2022	<p>Changes to ALMM including added proportionality</p> <p>Changes to COREP (own funds/own funds requirements)</p> <p>Changes to Asset encumbrance</p> <p>Changes to G-SII reporting</p> <p>Changes to Supervisory Benchmarking</p> <p>Changes to Resolution Planning</p> <p>Changes to Investment firms reporting</p>
3.1	From 06/2021	Module specific from 09/2021	<p>Reporting framework for investment firms under IFR (not covered in this document)</p> <p>Resolution planning (not covered in this document)</p> <p>Supervisory benchmarking</p>
3.0	From 06/2020	Module specific from 06/2021	<p>Changes and new requirements in relation to CRR2 (incl. Backstop Regulation)</p> <p>New reporting requirements in relation to BRRD2 (not covered in this document)</p>
2.10	From 04/2020	Module specific from 09/2020	<p>Updated Guidelines on Funding Plans</p> <p>Integration of remuneration into DPM and taxonomy</p> <p>Integration of fraudulent payments into DPM and taxonomy</p> <p>Minor changes to Resolution planning</p> <p>Update on supervisory benchmarking</p>

			Guidelines on COVID-19 measures reporting and disclosure
2.9	From 12/2018	Module specific from 12/2019	<p>Changes to COREP to align with new securitisation framework</p> <p>Changes to FINREP concerning NPE&FB, P&L and IFRS 16</p> <p>Changes to LCR to align with the LCR amending Act</p> <p>Update on supervisory benchmarking</p>
2.8	04/2018	31/12/2018	<p>New requirements for COREP (prudent valuation)</p> <p>Changes to the information on the credit risk, securitisations and Pillar 2</p> <p>Changes to the ITS on supervisory benchmarking of internal models</p> <p>New requirements for the ITS on resolution reporting</p>

Section 2 Reporting areas covered by national provisions

The following reporting areas continue to be covered by national provisions:

- Information on Staff expenses (B 2.5 B) and Detail on taxes (B 2.5 E)
- Information on participating interest and subordinated loans (B2.4)
- Analysis of shareholdings (B4.5)
- Persons responsible for certain functions and activities (B4.6)

The current reporting instructions as published in the CSSF circulars remain applicable as concerns the following reporting tables: B2.4, B4.5, B4.6

Section 3 Scope of application of the financial reporting requirements (FINREP)

1.1 Reporting of financial information on a consolidated basis

Financial information (FINREP) as defined under articles 9 and 10 of Commission Implementing Regulation (EU) No 680/2014 as amended shall be reported by the following institutions from 1 July 2014 onwards:

- credit institutions subject to article 4 of Regulation (EU) 1606/2002 (IAS regulation) and other credit institutions applying Regulation (EC) No 1606/2002 on a consolidated basis, by virtue of article 99(2) Regulation (EU) 575/2013
- credit institutions supervised on a consolidated basis by the CSSF, by virtue of article 99(3) Regulation (EU) 575/2013

2.1 Reporting of financial information on an individual basis

CSSF Circular 2014/593 as amended introduces the reporting of financial information (FINREP/ITS) as defined in the Commission Implementing Regulation (EU) 680/2014, subsequently Commission Implementing Regulation (EU) 2021/451, on an individual basis.

Section 4 Future evolution of the reporting requirements

As the reporting requirements continue to evolve at European level, the CSSF recommends that banks follow the publications of draft ITS and/or RTS or consultation papers of the EBA on its website. As regards European reporting, changes in the following areas are planned:

- [Publication of 2 June 2023:](#)

In preparation for the Pilot of its Pillar 3 Data hub project, the EBA has integrated in June 2023 a subset of Pillar 3 disclosure templates in taxonomy version 3.3. These templates (see Annotated Table Layout 330-P1-PILLAR3 3.3.xlsx) grouped in 4 modules (CONDIS, ESGDIS, FINDIS and REMDIS) will not be collected by the CSSF but will have to be sent directly to the EBA (more information to follow). Only a small number of institutions are included in the pilot (sample unknown at this stage).

Implementing Technical Standards on institutions' public disclosures of the information referred to in Titles II and III of Part Eight of Regulation (EU) No 575/2013 | European Banking Authority (europa.eu)

Implementing Technical Standards (ITS) on prudential disclosures on ESG risks in accordance with Article 449a CRR | European Banking Authority (europa.eu)

- Publication of 5 March 2019:

The European Banking Authority (EBA) launched a consultation on the updated Guidelines on harmonised definitions and templates for the reporting of funding plans. This update is the result of the experience gained through the EBA's assessment of banks' funding plans in 2017 and 2018 as well as the questions raised via the EBA Single Rulebook Q&A tool. The consultation runs until 5 May 2019.

<https://eba.europa.eu/-/eba-launches-consultation-to-update-guidelines-on-harmonised-definitions-and-templates-for-funding-plans-of-credit-institutions>

- Publication of 9 October 2018:

The European Banking Authority (EBA) acknowledged today the adoption by the European Commission of the Implementing Act amending Regulation (EU) No 680/2014 (Implementing Technical Standards on Supervisory Reporting) with regard to the inclusion of prudent valuation into COREP as well as other amendments. The Implementing Act, which is based on the final draft ITS on supervisory reporting submitted by the EBA in April 2018, was adopted by the Commission on 9 October 2018 but its publication in the EU Official Journal is still pending. The amended requirements will apply as of 31 December 2018 (reporting framework v2.8).

<http://www.eba.europa.eu/-/eba-acknowledges-adoption-of-amended-supervisory-reporting-standards-by-the-european-commission>

- Publication of 28 August 2018 :

The European Banking Authority (EBA) launched today three public consultations on amendments to the Implementing Technical Standards (ITS) on supervisory reporting for the reporting framework 2.9.

In particular, the three consultation papers cover the following areas:

- COREP: major revision of securitisation templates (simple, transparent and standardised (STS) regulation);
- FINREP: amended and new reporting of non-performing and forborne exposures, amendments to reporting of profit or loss items, minor amendments to reported data on leases due to new IFRS 16;
- COREP-LCR: review based on the coming new LCR delegated act. This LCR amending Act triggers some changes in the calculation of the LCR, which calls for a subsequent update of the ITS on LCR reporting to capture the necessary elements for its calculation and monitoring.

<https://eba.europa.eu/eba-launches-consultations-on-supervisory-reporting-for-the-reporting-framework-2-9-and-prepares-for-its-modular-release>

Chapter 2 Overview of the reporting requirements

The following tables give, by type of credit institutions, an overview of the main elements of the applicable reporting requirements (reporting templates, frequencies, remittance dates, template version, applicable EU regulations or CSSF circulars, among others).

The following tables do not intend to fully replicate the applicable regulations and instructions, but only to provide summary guidance.

Further details regarding the accounting version (codification L/N/S/C) as well as the "Preliminary/Final version" (N/D) are provided under Chapter 3, Section 3.

Important notice:

Following article 21(1)(a) of the Commission Implementing Regulation (EU) 2021/451, "information that is not required or not applicable shall not be included in a data submission". For instance³:

- (i) information only applicable on a consolidated basis, shall not be included in a data submission established on an individual basis;
- (ii) information only applicable on a semi-annual or annual basis, shall not be included in a data submission at the reference dates March and September;
- (iii) credit institutions using the standardised approach shall not report templates to be used when applying IRB approach;
- (iv)

³ The points listed are not exhaustive. Each credit institutions shall establish which information is required according to their business model

Part 2: Other regular reporting

Section 1 Harmonised definitions and templates for funding plans

On 9 December 2019, EBA published revised guidelines on harmonised definition and templates for funding plans of credit institutions under Recommendation A4 of ESRB/2012/02 (EBA/GL/2019/05 replacing EBA/GL/2014/04). In accordance to these guidelines, the CSSF identified and informed the institutions that shall submit data on funding plans.

Solely the institutions that were informed by the CSSF via a specific letter shall report data on funding plans in compliance with the Funding Plan Guidelines: institutions notified in the past based on the revoked GL shall continue reporting FP data while institutions recently notified based on EBA/GL/2019/05, if any, shall start reporting it. The data shall be reported at the highest level of consolidation of the institution, except otherwise specified.

1.1 Credit institutions supervised on an individual basis

Domain Code	Application	Frequency	Reference date	Latest remittance date	Versions to be provided
SFP	Templates for funding plans of credit institutions EBA guidelines EBA/GL/2019/05 of 9 December 2019

⁵ Credit institutions without branches shall report version L ; credit institutions with branches shall solely report version N

Section 2 Benchmarking portfolio assessment under article 78 of Directive 2013/36/EU (CRD IV)

On 29 June 2018, EBA published an updated ITS amending the Implementing Technical Standards (ITS) on benchmarking of internal approaches for running the 2019 exercise, to be adopted by the European Commission.

Commission Implementing Regulation (EU) No 2019/439 of 15 February 2019 has amended Implementing Regulation (EU) 2016/2070 as regards benchmark portfolios, reporting templates and reporting instructions to be applied in the Union for the reporting referred to in Article 78(2) of Directive 2013/36/EU of the European Parliament and of the Council.

The EBA has developed the Handbook on Supervisory Benchmarking of Internal Models: it is an online tool that provides guidance and links to the important documents relevant for this exercise. It is regularly updated and includes links to the published Q&As. It is available under the following link:

[Handbook on supervisory benchmarking | European Banking Authority \(europa.eu\)](https://www.europa.eu/euromonitoring/handbook-on-supervisory-benchmarking)

Remarks:

Credit institutions without branches shall report version L; credit institutions with branches shall solely report version N

Section 3 Declaration of liquidity related products and services referred to in Article 23(2) of Commission Delegated Regulation (EU) N° 2015/61 (LCR DA)

Particular attention should be drawn on Article 23(2) of the LCR DA requiring an assessment and declaration of potential liquidity outflows in relation to products or services which are not captured in Articles 27 to 31a of the LCR DA.

In accordance with the above mentioned article and with regard to the new LCR data reporting framework (SLCRDA and CLCRDA), the following principles shall be complied by all Luxembourg credit institutions that are not significant under the SSM and by all non-EU branches:

(i) According to the reporting instructions of the new LCR data reporting framework, all credit institutions have to report the maximum amount that could be drawn from these products and services in the reporting table C 73.00 (rows 730 to 870) regardless of the fact if these outflows are material or not.

(ii) On the basis of Article 23(2) of the LCR DA, an annual assessment on the materiality of these outflows has to be done under the assumption of a combined idiosyncratic and market-wide stress.

(iii) Credit institutions have to submit to the CSSF the outcome of the above mentioned materiality assessment at the latest by the end of the reporting year. Where the likelihood and potential volume of the liquidity outflows have been assessed as material, credit institutions have to provide the CSSF with their assessment and with an outflow factor proposal.

(iv) Credit institutions shall only apply an outflow factor on the products or services referred to in Article 23 if they have been notified by the CSSF. Where no notification has occurred, credit institutions shall apply a 0% outflow factor on these items.

Section 4 Advanced ad-hoc data collection on Interest Rate Risk in the Banking Book (IRRBB)

On 3 August 2023 EBA published decision concerning ad-hoc collection by competent authorities to the EBA of institutions' IRRBB data (EBA/DC/501).

For reference date 31 December 2023 only a limited QIS sample participating in the Basel III monitoring exercise is concerned by the EBA exercise.

ECB Banking Supervision additional requirements on IRRBB: The IRRBB ad-hoc module is required for 2023Q4, 2024Q1 and 2024Q2 reference dates for all the Significant Institutions at the highest level of consolidation. The remittance dates will be aligned with the STE remittance dates.

For other entities [CSSF circular 08/338](#) as amended applies until entry in force of DPM 3.4. From DPM 3.4 (30 September 2024 reference date onwards) ITS will be extended to full population of institutions already submitting COREP.

[QIS / BASEL III monitoring](#)

[Draft ITS on supervisory reporting amendments with regard to IRRBB reporting](#)

Section 5 ESG pillar 3 disclosures

Domain Code	Templates	Frequency	1 st application date	Remittance date	Versions to be provided
ESG pillar 3 disclosures (XBRL format through eDesk/API) Article 449a of Regulation (EU) 575/2013 Article 18a of Commission Implementing Regulation (EU) 2021/637 Decision of the European Banking Authority EBA/DC/498 concerning ad hoc collection by competent authorities to the EBA of institutions' ESG data and amendment of the Annex to EUCLID Decision EBA expects only large, listed banks to report the XBRL ESG module. However, the ECB is extending XBRL ESG reporting to all the entities (even if non-listed) subject to ECB Short Term Exercise (STE) Annex 1 reporting and therefore expects: <ul style="list-style-type: none"> - SI at the highest level of consolidation to report D 01.00, D 02.00.a and D 02.00.b templates already by 15/03/24 and the rest of the templates by 17/06/24 (a complete XBRL submission by 15/03 is also accepted). - targeted SI subsidiaries to report only D 01.00, D 02.00.a and D 02.00.b templates for reference period Q4 2023 by 15/03/24 					
ESG	<u>D 01.00 – D 10.00</u>	Semi-annually	31 December 2023	15 March 2024 (fixed by ECB, only for D1.00 and D 02.00) 17 June 2024 (10 working days before EBA deadline)	Accounting versions L/N/C to be provided Preliminary (N) version to be provided

[Filing rules v5.3](#) is published regarding the ESG ad-hoc collection (as per EBA/DC/498 from 06 July 2023). The Pillar 3 ESG disclosures of institutions are requested in millions, the precision of the data transmitted will therefore be of millions of units (in accordance with Article 19, point 4 (a) of the ITS on public disclosures (EU) 2021/637) (@decimals >= "-6").

Chapter 3 Specific instructions

Chapter 3 provides an overview on the reporting reference dates (Section 1), specific reporting points/instructions (Section 2), the applicable accounting versions (Section 3) and the applicable accounting standard (Section 4).

Section 1 Reporting reference dates

Credit institutions shall submit the reporting templates as specified under Chapter 2 Part 1 on the following reference dates:

- Monthly reporting : on the last day of each month
- Quarterly reporting : 31 March, 30 June, 30 September and 31 December
- Semi-annual reporting : 30 June and 31 December
- Annual reporting : 31 December

Credit institutions shall submit the reporting templates as specified under Chapter 2 Part 2 on the following reference dates:

- Templates on funding plans: 31 December

Section 2 Specific reporting points/instructions

- A new document available under :

<https://www.cssf.lu/wp-content/uploads/Additional-guidance-for-Credit-Institutions-related-to-specific-reporting-aspects.pdf>

gives additional guidance to the banks related to specific reporting aspects that need to be further developed.

- For banks subject to FINREP reporting:
 - impairments to be reported in FINREP F04.03.1 (row 0180, columns 0050 to 0070), FINREP F18.00.b (row 0201, column 0130) and FINREP F20.04 (column 0031, sum across all countries) must simultaneously have the same sign. Moreover, if one of first two data points is reported, the two other data points must be reported as well.
 - impairments to be reported in FINREP F04.04.1 (row 0140, columns 0050 to 0070), FINREP F18.00.b (row 0180, column 0130) and FINREP F20.04 (column 0031, sum across all countries) must simultaneously have the same sign. Moreover, if one of first two data points is reported, the two other data points must be reported as well.
 - impairments to be reported in FINREP F 06.01 (line 0190, column 0021), FINREP F18.00.b (row 0120 + row 0196, column 0130) and FINREP F20.07.1 (line 0190, column 0021, sum across all countries) must simultaneously have the same sign. Moreover, if one of those three data points is reported, the two other data points must be reported as well.
 - impairments to be reported in FINREP F09.01.1 (rows 0010 to 0240, columns 0040 to 0060), F18.00.b (rows 0340 to 0550, columns 0130) must simultaneously have the same sign. Moreover, if one of those two data points is reported, the other data points must be reported as well.
- For banks subject to COREP Solvency reporting, the reporting of lines 0130 to 0210 in template C 03.00 is subject to instructions available under:
<https://www.cssf.lu/wp-content/uploads/Additional-guidance-for-Credit-Institutions-related-to-specific-reporting-aspects.pdf>
- For banks subject to COREP Solvency reporting, the reporting of lines 225 (Eligible capital for the purposes of qualifying holdings outside the financial sector) in template C 04.00 is mandatory.
- For banks subject to COREP Solvency reporting, the reporting of lines 850 (Non-domestic original exposures) and 860 (Total original exposures) of template C 04.00 is mandatory as the ratio between those lines is indeed used to determine if a bank exceeds the 10% threshold of non-domestic exposures. If it exceeded it, it has to provide the geographical breakdown of its exposures in COREP/FINREP reportings, where appropriate, according to Commission Implementing Regulation (EU) 2021/451 as amended.
- Each LEI code reported in COREP, FINREP and LAREX reportings shall be technically valid:
 - (i) the length of the code must be 20
 - (ii) the characters at position 1 to 18 must be alphabetic (A-Z) or numeric (0-9)
 - (iii) the last 2 positions must represent a correct LEI modulo 97 check digit
 - (iv) the characters at position 19 to 20 must be numeric (0-9)
- As specified in circular CSSF 17/664, the reporting requirements specified in templates B2.5 B and B 2.5 E shall be reported on an annual basis, the first remittance being due for the year 2017. Templates B 2.5 B and B 2.5 E are sub-templates of table B 2.5. In order to limit the burden and costs of the development of a new taxonomy only for the purpose of reporting the information required in templates B 2.5 B and B 2.5 E, the CSSF decided the following:

Credit institutions shall use the existing taxonomy for reporting table B 2.5 but mandatorily only need to fill in information related to the templates B 2.5 B and B 2.5 E; information related to the templates B 2.5 A, C and D shall be left empty (any potential content in these templates B 2.5 A, C and D will be ignored by the CSSF). The file name convention remains the same.

The report B2.5 with templates B 2.5 B and B 2.5 E shall be established using as reporting period the accounting year-end of the credit institution. Thus, credit institutions that have an accounting year-end deviating from the calendar year shall report B 2.5 B and B 2.5 E

based on the figures of their accounting year-end and use that same accounting year-end as reporting period. For example: a credit institution with an accounting year-end as of March 31st shall report B 2.5 B and B 2.5 E with the figures of March 31st (for the period 01.04 to 31.03) using reporting period yyyy-03.

Templates B 2.5 B and B 2.5 E shall be submitted earliest on January 1st and at the latest on February 11th of the following year, irrespective of the closing date. The "Final code" to be used is 'N' as the figures reported may be general ledger based and do not need to have been audited externally (Version 'D' is obsolete and shall not be submitted).

- Following Regulation (EU) 2017/1538 of the ECB on reporting of supervisory financial information of 25 August 2017, Annex I (c), templates F 17.01, F 17.02, F 17.03 and F 40.01 of the FINREP framework shall be reported according to the instructions below:
 - (i) Templates 17.1, 17.2 and 17.3 shall be provided only by credit institutions reporting on a consolidated basis (CFINREP).
 - (ii) Template 40.1 shall be provided by credit institutions reporting on a consolidated basis (CFINREP) and credit institutions that are not part of a group reporting on an individual basis (SFINREP).
- For banks subject to LAREX reporting, percentages to be reported in LAREX C 26.00 (row 030, column 010), LAREX C 29.00 (columns 240 and 360) and LAREX C28.00 (columns 230 and 350) are allowed to have up to 8 decimal positions.

Section 3 Versioning conventions

2 codes shall be used for the versioning of reporting tables, i.e. the "Accounting version" (L/N/S/C) and the "Preliminary/Final version" (N/D). The codification of the "Accounting version" and the "Preliminary/Final version" is captured in the file naming convention, according to which the reporting files are to be communicated to the CSSF (cf. Section 5, Chapter 1).

3.1 Accounting version

The "Accounting version" codification is used to identify four different consolidation levels:

3.1.1 Reporting on an individual basis

Depending on the applicability of the different templates (cf Chapter 2), credit institutions established under Luxembourg law with foreign branches submit the requested information in (up to three) distinct *accounting versions*, using the following codes to distinguish the files for the purposes of the data transmission:

- Code **L**: reporting on an individual level, excluding foreign branches of Luxembourg based banks
- Code **N**: reporting on an individual level, including the information related to the credit institution incorporated under Luxembourg law (head office) including its foreign branches, after elimination of reciprocal transactions and outstanding balances between the head office and its branches
- Code **S**: information for each branch separately

Credit institutions incorporated under Luxembourg law without branches, Luxembourg based branches of non-EU institutions and Luxembourg based branches of EU institutions, shall submit the reporting requirements on an individual level, in one a single version, using only the code **L**.

3.1.2 Reporting on a (sub-) consolidated basis

Credit institutions incorporated under Luxembourg law, which are subject to supervision on a (sub)-consolidated basis shall submit the reporting requirements on an individual basis as specified under point 1.3.1 of this section and also submit some reporting requirements on a consolidated basis, using the code C.

The version **C** shall include the information related to the credit institution incorporated under Luxembourg law including the subsidiaries and/or participating interests included in the scope of consolidation and, if appropriate, the information related to the branches of the entities comprised in the scope of consolidation, after elimination of reciprocal transactions and outstanding balances between the entities comprised in the scope of consolidation.

The scope of consolidation for the reporting requirements is the prudential perimeter as defined by Regulation (EU) 575/2013 and the Capital Requirements Directive perimeter as defined by the law of 5 April 1993 related on the financial sector, as amended⁶.

3.2 Preliminary/final version

The code *final version* is used to distinguish reporting tables carrying audited figures (final versions) from tables carrying non-audited figures (preliminary version). The final version of the reporting on financial information refers to the accounting year-end figures as audited by the external auditor.

All reporting templates referring to financial information (SFINRP, CFINRP) have to be submitted in preliminary versions (the code preliminary version bearing the value 'N'); in addition to these preliminary figures of accounting versions L/S/N/C (as applicable according to paragraph 3.1), credit institutions, except branches of credit institutions whose head office is in the EU, shall mandatorily submit annually a final version of all accounting versions L/S/N/C as applicable. For branches of credit institutions whose head office is in the EU, final version 'D' is not mandatory but needs to be provided in case of material changes compared to the 'N' version provided previously.

For the final version, the code *final version* bears the value 'D'. The final version shall be submitted together with the documents related to the publication of the year-end figures, at the latest two weeks before the annual general meeting.

Section 4 Accounting standard

In accordance with article 24(2) of the Regulation (EU) 575/2013, the CSSF requires that institutions effect the valuation of balance sheet and off-balance sheet items and the determination of own funds in accordance with the International Accounting Standards as applicable in the European Union.

Thus, the underlying reporting frameworks shall be established according to the International Accounting Standards (IFRS).

Section 5 CSSF expectations related to validation rules, CSSF plausibility checks and ECB additional supervisory data quality checks (EGDQ)

1. Expectations in the case where validation rules with severity status "Warning" are triggered

Validation rules with the severity status "Warning" are equally binding to validations rules with the severity status "Error" in the sense that they shall also be considered and closely monitored by reporters. Explanations about failure should be provided to the CSSF (reportingbanques@cssf.lu) where needed, i.e. reporters are expected to analyse the results of "Warning" validation rules and verify and revise the data, if necessary. Some warnings may not be applicable to all reporters, in all

⁶ Should the scope of consolidation as defined by the Regulation (EU) 575/2013 (CRR) differ from the one of the law of 5 April 1993 related on the financial sector, as amended, it is the CRR scope of consolidation that should be considered. This situation may occur during a transitional period until the amendment of the law of 5 April 1993 related on the financial sector to take into account the requirements of the Directive 2013/36/EU as published on 26 June 2013.

circumstances, or to all reference dates. As such, not meeting them will not necessarily prevent the successful submission of data. "Warnings" may become "Error" validation rules in the future.

2. CSSF plausibility checks

CSSF plausibility checks ("v_cssfxxx" generating automatic rejection messages when triggered) and BCL/CSSF liquidity quality checks ("QC_AMML_XX" / "QC_LCRDA_XX") are applicable to both Credit Institutions and Class 1 Investment Firms as long as they are subject to the reporting of the modules on which the check is applied (see columns "Scope" and "Module" of sheet "CSSF plausibility checks").

3. ECB Expert Group on Data Quality (EGDQ) checks

The ECB's Banking Supervision Data Division, in cooperation with national competent authorities (NCAs) within the Single Supervisory Mechanism (SSM), has published a [set of extra data quality checks](#) in addition to those already included in the European Banking Authority's supervisory reporting frameworks. These checks are being referred to as EGDQ checks (Expert Group on Data Quality checks). They are aimed at enhancing the quality of supervisory reporting data in accordance with Article 4(1) of Decision ECB/2014/29 of 2 July 2014 as amended by Decision ECB/2017/23 of 3 August 2017

Supervised entities are encouraged to implement EGDQ checks in their own reporting systems prior to the submission of data to the CSSF.

The ECB EGDQ Checks (for which the validation results will be included directly within the COFFBX feedback file (see paragraph 3.1.23 of Chapter 5)) are also applicable to both Credit Institutions and Class 1 Investments Firms as long as their reporting modules are transmitted to the ECB.

A proportionate approach will be followed by the CSSF:

- as far as Significant Institutions are concerned, the triggering of EGDQ checks with error severity status will always require a resubmission. The triggering of EGDQ checks with warning severity status will require a resubmission when the mistake is acknowledged by the bank or an explanation when it is impossible for the bank to resubmit (specific situation or exceptional circumstances). In this last case, banks shall send their explanations related to the triggered EGDQ warnings to reportingbanques@cssf.lu as referred to in point 1 of this Section.
- with respect to Less Significant Institutions, in consideration of the costs associated to resubmissions, a resubmission may be requested by the CSSF for failing EGDQ checks in case an error is deemed material.

Section 6 Reminder letters for delayed/erroneous reporting modules

Reporting institutions shall submit to the CSSF European harmonized reporting and national reporting modules by the dates respectively indicated in [Article 3 of Commission Implementing Regulation \(EU\) 2021/451 of 17 December 2020](#) and in the applicable CSSF circulars/documents (CSSF Circulars [18/686](#), [17/664](#), [13/576](#), [12/553](#) and [instructions related to table B 4.4](#)).

The remittance dates are also reminded in Chapter 2 of the present document.

On the day after the deadline, if the reporting module is either missing, in error or still contains warnings, a first reminder letter is transmitted via email to the institution's reporting contacts.

Following the reception of a CSSF reminder letter, the reporting institution is requested to:

- submit immediately the missing file if it has not been submitted yet;

- for EU harmonized reporting module: consult the CSSF COFFBX feedback file (and in particular sheets "XBRL 2.1", "Dimensions", "Filing Rules", "Formula assertions", "CSSF FEEDBACK" and "ECB FEEDBACK") to be in a position to amend the erroneous reporting accordingly;
- in the absence of a CSSF COFFBX feedback file: verify if it has received an email from gfd@cssf.lu (only valid for fatal technical errors and for errors triggered on CSSF national reporting modules for which no COFFBX feedback file is produced).

At least 2 days after the first reminder letter, in the absence of a first sending or if the reporting module has still not been corrected, a second reminder letter is sent by email to the management of the reporting institution (escalation process).

Note that reminder letters can also be generated at a later stage in case of erroneous resubmissions.

Chapter 4 Applicable regulations and instructions

This chapter summarises the legal basis and instructions based on which credit institutions submit regular reporting requirements to the CSSF.

Section 1 Areas covered by EU regulations

The European regulations on prudential reporting requirements are available via the Official Journal of the European Union (EUR-Lex) at www.eur-lex.europa.eu

- Regulation (EU) No 575/2013
- Regulation (EU) No 2019/630
- Regulation (EU) No 2019/876
- Commission Delegated Regulation (EU) 2015/61
- Commission Implementing Regulation (EU) No 2021/451 repealing Commission Implementing Regulation No 680/2014 as amended
- Commission Implementing Regulation (EU) 2016/2070
- Commission Implementing Regulation (EU) 2021/453

An overview of the reporting frameworks is published by the EBA on the following address:

<https://www.eba.europa.eu/risk-analysis-and-data/reporting-frameworks>

Section 2 Areas covered by national provisions

The reporting templates, with the related instructions and schedule of conditions, which continue to be governed by national provisions (CSSF circulars), are available at the CSSF website under "Prudential reporting for credit institutions":

<https://www.cssf.lu/en/prudential-reporting-credit-institutions/>

The CSSF circulars may be downloaded at:

https://www.cssf.lu/en/regulatory-framework/?content_type=567&entity_type=480

Chapter 5 Reporting format and technical specifications

Section 1 File format and file naming convention

1.1 Reporting areas governed by EU regulations

Regulation (EU) 575/2013:

Data points covered by Regulation (EU) 575/2013 shall be reported in the XBRL (eXtensible Business Reporting Language) format.

The taxonomies to be used for reporting purposes have been published by the EBA (European Banking Authority) under the following addresses:

Owner	Version	Applicability	Status	URL
EBA	V2.8.1	From 2018-12 until the official applicability of V2.9.0	Final	same as before Remark: Modules of COREP and RES to be sent using V2.8.1 (RES only if in XBRL) Modules of FINREP, FP, AE, SBP to be sent using V2.8.0
EBA	V2.9.0	From 2019-09/12 (SBP, RES), 2020-03/04 (COREP, AE, FP), 2020-06 (FINREP) until the official applicability of V2.10.0	Final	same as before Remark: 2.9.0 will be applicable for ALL BUT FINREP and COREP reporting frameworks
EBA	V2.9.1.1	From 2020-03/04 (COREP), 2020-06 (FINREP) until the official applicability of V2.10.0	Final	same as before Remarks: - Applicable for FINREP and COREP reporting frameworks only - Version 2.9.1 is obsolete and not to be used for any production reporting, only 2.9.1.1 is allowed.
EBA	V2.10.0 V2.10.1	From 2020-09 (covid19, sbp_imv) resp. 2020-12 (other reports of V2.10.0 / V2.10.1) until the official applicability of V3.0.0	Final	same as before Remark: - The SBPCR reports (CSBPCR, SSBPCR) can only be delivered in the corrected version published by EBA on Aug. 3 rd where the applicable values of dimension FLI on C_114.00 were corrected - The FP (Funding plans) report can exclusively be remitted to CSSF in the V2.10.1 version, all other V2.10 XBRL reports requested by CSSF shall make use of the applicable V2.10.0 phase 1 resp. phase 2 module
EBA	V3.0 phase 1 and 2	From 2021-06 until the official applicability of V3.1	Final	same as before Remark: - For V3.0, only the latest errata version published by EBA (marked at present e.g. for phase 1 "Updated 14 January 2021" and for phase 2

				<p>"Updated 3 June 2021") will be accepted (based on the according DPM)</p> <ul style="list-style-type: none"> - Any remuneration report in XBRL for 2020-12 has to be submitted using V3.0 phase 2 remuneration - Reports originally from V3.0 phase 1, but corrected V3.0 phase 2, will exclusively be accepted in their phase 2 version (EA, GSII)
EBA	V3.1 phase 1 and 2	From 2021-09 until the official applicability of V3.2	Final	same as before
EBA	V3.2 phases 1, 2 and 3	From 2022-12 until the official applicability of V3.3	Final	same as before
EBA	V3.3 phases 1, 2 and 3	From 2023-12 until the official applicability of V3.4	Final	same as before
SRB	LDR 2019	From 2018-12 until the official applicability of LDR 2020	Final	https://srb.europa.eu/en/content/liability-data-report
SRB	Resolution 2020	From 2019-12 until the official applicability of Resolution 2021	Final	https://srb.europa.eu/en/content/2020-resolution-reporting

Important notice:

When submitting a reporting, institutions shall **mandatorily** use the version of the taxonomy (column 2) in use for the period applicable to the reporting reference date (column 3). This means (for example):

- (i) Reporting with reference dates March 2014 to August 2014 have to be submitted using the taxonomy v2.0,
- (ii) Reporting with reference dates September 2014 to November 2014 have to be submitted using the taxonomy v2.1,
- (iii) Reporting with reference dates December 2014 to May 2015 have to be submitted using the taxonomy v2.2,
- (iv) Reporting with reference dates June 2015 to August 2016 have to be submitted using the taxonomy v2.3.1,
- (v) and so on...

This is also applicable in case of a later resubmission. For example, in case of a resubmission in November 2016 of a reporting with reference date December 2015, it is mandatory to use the taxonomy v2.3.1 and not the taxonomy version 2.4.1.

Unless specified otherwise in the present chapter, all XBRL instances to be sent to CSSF have to be fully compliant with the XBRL format defined by the EBA.

The following "file naming conventions" and "entry points" will apply for reports **FROM EBA V3.2**:

Report name	File naming convention	Version	Data domains	Entry point
COREPX	"COF"	from V3.2	CSOLV CIPLO SSOLV SIPLO	corep_of.xsd
LEVERX	"COF"	from V3.2	CLEVDA SLEVDA	corep_lr.xsd

LAREXX	"COF"	from V3.2	CLAREX SLAREX	corep_le.xsd
NSFRXX	"COF"	from V3.2	CNSFR SNSFR	corep_nsfr.xsd
ALMXXX	"COF"	From V3.2	CALMM SALMM	corep_alm.xsd
LCRDAX	"COF"	From V3.2	CLCRDA SLCRDA	corep_lcr_da.xsd
FRTBXX	"COF"	From V3.2	CFRTB SFRTB	<i>EBA V3.2 module corep_frtb</i>
FINREP	"COF"	From V3.2	CFINRP SFINRP	finrep9.xsd
AEXXXX	"COF"	From V3.2	CAE SAE	ae.xsd
FPXXXX	"COF"	From V3.2	CFP SFP	fp.xsd
SBPCRXX	"COF"	From V3.2	CSBPCR SSBPCR (credit risk benchmarking removed)	sbp_cr.xsd
SBPIF9	"COF"	From V3.2	CSBPIF9 SSBPIF9 (IFRS9 credit risk benchmarking)	sbp_ifrs9.xsd
SBPRMX	"COF"	From V3.2	CSBPRM SSBPRM	sbp_rm.xsd
SBPIMV	"COF"	From V3.2	CSBPIM SSBPIM	sbpimv.xsd (from 2022-12 ff, see below for exceptional reference period 2022- 09 !!)
RESOLX	"COF"	From V3.2	RESOL	resol.xsd
COVIDX	"COF"	From V3.2	COVID	covid19.xsd
REMXXX	"COF"	From V2.10	REM	<i>Obsolete</i>

REMHEX	"COF"	From V2.10	REMHE	<i>Obsolete</i>
PSDFRP	"COF"	From V2.10	PSDFRP	psd_frp.xsd (Fraudulent payments - if requested by CSSF in XBRL)
GSIIXX	"COF"	From V3.2	CGSII	<i>EBA V3.2 module gsii</i>
n/a	n/a	From V3.3	IRRBB	<i>Obsolete as COFREP See chapter 5 section 3.1.28</i>
n/a	n/a	From V3.3	ESG	<i>Obsolete as COFREP</i>
n/a	n/a	From V3.3	IPU	<i>Obsolete as COFREP</i>
NOTIMP	"COF"	From V3.0	See https://www.cssf.lu/en/Dokument/resolution-reporting-requirements/	<i>EBA V3.0 ff module notif_impracticability</i>
MRDECI	"COF"	From V3.0	See https://www.cssf.lu/en/Dokument/resolution-reporting-requirements/	<i>EBA V3.0 ff module mrel_decisions</i>
MRTLAX	"COF"	From V3.2	See https://www.cssf.lu/en/Dokument/resolution-reporting-requirements/	<i>EBA V3.2 ff module mrel_tlac</i>

N.B. The SRB reports can be found in a separate Reporting Handbook regarding Resolution only

The historic "file naming conventions" and "entry points" have been moved to **Annex 2** and continue to apply to reports for reference periods **BEFORE EBA V3.2**.

The mandatory file naming convention has been specified in the following document:

<https://www.cssf.lu/en/document/naming-convention-for-cssf-reportings/>

Examples:

.ZIP	Instances
COFREP-B00000999-2014-03-CCOREP-00-L-N-S-.zip	COFREP-B00000999-2014-03-CCOREP-00-L-N-S-CCOREP.xbrl
COFREP-B00000999-2014-03-CLAREX-00-L-N--.zip	COFREP-B00000999-2014-03-CLAREX-00-L-N---CLAREX.xbrl
COFREP-B00000999-2014-03-CLCRXX-00-L-N--.zip	COFREP-B00000999-2014-03-CLCRXX-00-L-N---CLCRXX.xbrl
COFREP-B00000999-2022-12-COREPX-00-C-N--.zip	COFREP-B00000999-2022-12-COREPX-00-C-N---COREPX.xbrl
COFREP-B00000999-2022-12-COREPX-00-L-N--.zip	COFREP-B00000999-2022-12-COREPX-00-L-N---COREPX.xbrl

N.B. The last 2 examples are a consolidated COREP V3.2 instance with consolidated accounting code 'C' resp. a solo COREP V3.2 instance with solo accounting code 'L'; both have sub-type '-' (see also chapter 5 section 3.1.27).

Remark regarding the coverage of the SCOREP instances:

Credit institutions established under Luxembourg law with foreign branches shall submit 3 versions of SCOREP (see chapter 2 section 1 paragraph 1.1)

Accounting version	Frequency	Content	Filing indicators
N	Quarterly	SOLV, LEVR (plus IPLO in semi-annual instances until 2020-12 and annual instances since 2021-12)	all applicable filing indicators for SCOREP <ul style="list-style-type: none"> - excepted for C_15.00 in instances for reporting quarters Q1 & Q3 until 2020-12 - excepted for C_15.00 in instances for reporting quarters Q1, Q2 & Q3 from 2021-03
L	Semi-annual until 2020-12 Annual since 2021-12	IPLO	C_15.00 only
S	Semi-annual until 2020-12 Annual since 2021-12	IPLO	C_15.00 only

1.2 Reporting areas governed by national provisions

The following “file naming conventions” and “file format requirements” apply:

Report names	File naming convention	File format requirement
B 2.4 ⁷ ,	“FRC”	XBRL
B 2.5	“FRC”	XBRL
B 4.5	Cf. dedicated user guide	Webform/JSON
B 4.6	Cf. dedicated user guide	Webform/JSON

by following the encryption standards, procedures and file naming conventions detailed in:

[Methods of transmitting reports via external channels \(Naming convention\) – CSSF](#)

Naming convention examples:

All versions	B4.6	Webform/JSON	eDesk/API	02/01/24	User guide available in eDesk

2.2 Transmission channels details

2.1.1 External channels

Encryption standards, procedures and file naming conventions are detailed in <https://www.cssf.lu/en/file-transport-and-data-protection/>

Regarding COFREP reportings, All PRODUCTION instances MUST be sent using either :

- ➔ **code 'D'**: definitive version (PRODUCTION – FINREP only)
- ➔ **code 'N'**: non-definitive version (PRODUCTION)

Only by sending PRODUCTION instances flagged with one of the codes ('N', 'D') credit institutions can fulfil their obligations to comply with the legal reporting requirements defined by CSSF. In other words, at the ITS remittance date banks must have sent to CSSF at least one production instance for each report due.

Production instances flagged ('N', 'D') can of course only be sent for PAST reference periods.

2.1.2 eDesk/API

- [For each eDesk procedure, a dedicated user guide is available on the CSSF eDesk portal. This document details the different sections from the form as well as applicable features \(including API when applicable\).](#)
- [A technical guide is also available for API solution : Methods of transmitting reports via API – CSSF](#)

2.2 Testing environment with future sending possibility

[For the COF file naming convention \(XBRL according to EBA standards\)](#), both production and test files can be sent via the **PRODUCTION system of reporting channels** using means "Canaux externes historiques" referenced in Circular CSSF 23/833

1) Sending XBRL PRODUCTION instances

All PRODUCTION instances MUST be sent using either

- ➔ **code 'D'**: definitive version (PRODUCTION – FINREP only)
- ➔ **code 'N'**: non-definitive version (PRODUCTION)

Only by sending PRODUCTION instances flagged with one of the codes ('N', 'D') credit institutions can fulfil their obligations to comply with the legal reporting requirements defined by CSSF. In other words, at the ITS remittance date banks must have sent to CSSF at least one production instance for each report due.

Production instances flagged ('N', 'D') can of course only be sent for PAST reference periods.

2) Sending XBRL TEST instances

Optionally, credit institutions MAY send TEST files to CSSF to have some feedback on the validation results they would have if these files were sent in production.

- ➔ **code 'X'**: definitive version (TEST – FINREP only)
- ➔ **code 'T'**: non-definitive version (TEST)

For ALL TEST instances the following characteristics apply:

- An XBRL TEST instance will be sent (just the same as an XBRL PROD instance) via the **PRODUCTION system of reporting channels** using means "Canaux externes historiques" referenced in Circular CSSF 23/833 (only the code for the definitive / non-definitive version will distinguish them from PRODUCTION files)
- TEST instances will be operational and accepted by CSSF for **reference periods 2019-01 and later** (not for any reference periods before).

- There will be no possibility to convert a TEST instance into a PROD version or vice versa; if needed, both will have to be submitted to CSSF independently.
- At the present stage and just like in production, all COF reports can be sent using 'N' / 'T' version while only reports SFINRP and CFINRP can be sent using the 'D' / 'X' version.
- There will be no "ECB FEEDBACK" sheet (see paragraph 3.1.23 in Chapter 5) included within the COFFBX files associated to TEST instances.

For TEST instances referring to a **PAST REFERENCE PERIOD** at the day of remittance the following characteristics apply:

- Reports expected in TEST are the same as those expected in PROD
- For all checks that are still performed by CSSF (XBRL validation rules, CSSF local validation rules v_cssfxxx), the testing environment will be fully equivalent for PAST REFERENCE PERIODS to the production environment.

For TEST instances referring to a **FUTURE REFERENCE PERIOD** at the day of remittance the following characteristics apply by default:

- There is a limitation for future reference periods: test files may use reference periods whose end date is **LESS THAN 2 years in advance** at the day of remittance
- The version of the taxonomy used must correspond for the reference period of the test file to the applicable version planned and announced by the EBA
- The testing environment will usually allow the remittance of previously known reports (i.e. defined already in previous versions of EBA taxonomies) in their updated version; **new reports** (coming with a future EBA taxonomy version and not known before that version) will not be available at early stages to all credit institutions and will only be added over time for them to the system.
- The applicable future **filing indicators** will not be tested anymore.
- For future test files, the list of **deactivated rules** applicable in CSSF production systems will evolve over time during the tests according to EBA publications; the update of the DEACTIVATED FUTURE EBA rules will take place on a best effort basis.

N.B. The 3 last aspects clearly state that there MAY BE DIFFERENCES when testing files under "FUTURE" conditions compared to the result the same file will give a few months later when sent under "PRODUCTION"/"PAST" conditions. In case a bank wants to make a specific FUTURE test (allowing new reports, specific filing indicators, deactivated rules), the according test configuration may be asked for at mail address reportingbanques@cssf.lu. Please be aware that any support for this type of tests can only be given on a best-effort basis and may be denied if the effort to maintain production files does not permit their support.

Section 3 Specific requirements regarding XBRL instances

3.1 Reporting areas governed by Regulation (EU) 575/2013

The present chapter describes the main technical requirements that XBRL instances sent to the CSSF must fulfil.

3.1.1 EBA XBRL Filing Rules

Unless specified otherwise in the present document, all instances must be **fully compatible** with the applicable document "**EBA XBRL Filing Rules**" that is part of the respective EBA taxonomy documentation.

The EBA XBRL filing rules can be downloaded from the web-page of the applicable version of the EBA taxonomies.

As an example, rev. 4.4 can be downloaded at:

https://eba.europa.eu/sites/default/documents/files/document_library/Risk%20Analysis%20and%20Data/Reporting%20Frameworks/Reporting%20Framework%202.10/882113/EBA%20Filing%20Rules%20v4.4.pdf

Caveats:

1) Some of the rules are marked "MUST", others are marked "SHOULD". CSSF will not generate errors anymore for the "SHOULD" rules 2.6, 2.7, 2.21, 2.22, 2.23, 3.4, 3.5

2) Mainly two EFR rules changed in the revisions 3 and 4.1 of the EBA XBRL Filing rules document

a) 3.1 Choice of Currency for Monetary facts

This set of rules adapts the EFR to the real multi-currency introduced by into the EBA Taxonomy 2.4.

Some modules (all SBP / SBPIMV) manage that multicurrency exclusively via the unit mechanism of XBRL, so there is redundancy and thus no conflict with any table structures

Other modules (e.g. LCR / LCRDA / NSFR / ALM) have a reference to the units monetary facts refer to at 2 levels

- *in the unit mechanism of XBRL*
- *in the table structures of the multi-currency tables of those modules*

EFR 3.1 c) makes sure that in this latter case no inconsistency can occur among these redundant information. This rule will be enforced by CSSF.

b) 1.6 — Filing indicators

In revisions 3 (and 4.1 which added point d), EBA replaced

Instances MAY include appropriate negative (@filed="false") filing indicator elements indicating reporting units which are intended NOT to be reported in the instance, or these MAY be omitted (for clarity of intent, inclusion of such negative indicators is preferred).

by

(b) Instances MAY include appropriate negative (i.e. with @filed="false") filing indicator elements indicating reporting units which are intended NOT to be reported in the instance.

(c) Negative filing indicators MUST be included when a reporting unit is deliberately not reported which is potentially expected by the EBA to be contained in that instance (e.g. due to the reporter having no relevant transactions or positions to report, or on that occasion falling outside a relevant threshold for the reporting of the unit), in order to express the intention of the reporter not to report definite values for said template.

(d) The context referenced by the filing indicator elements MUST NOT contain xbrli:segment or xbrli:scenario elements.

Comments from CSSF:

While in rev. 2 the use of negative filing indicators was optional, in revision 3 it has become mandatory for some cases, particularly: (1) **the reporter having no relevant transactions or positions to report** and (2) **falling outside a relevant threshold for the reporting of the unit**).

All reports submitted to CSSF shall respect from now on these EBA specifications.

Further details on the exact use of the filing indicators are published in the CSSF website under: Prudential reporting for credit institutions, Common European reporting, "The use of Filing Indicators". Hereafter the link to the documents:

<https://www.cssf.lu/en/prudential-reporting-credit-institutions/>

3.1.2 Instance coverage

All CSSF instances cover a single set of data related to

- one single reporting entity
- one single reporting period
- the appropriate unit

Remark: since the 2.4 taxonomy set of the EBA, it has become mandatory to report some monetary items in their native currency. The appropriate unit is now defined as follows:

Case	Appropriate Unit
All monetary items for taxonomies up to V2.3.2	capital currency of the reporting entity
All amounts from taxonomies from V2.4.1 having no dimension CCA in their context (i.e. referring to dimension default x0= "Not applicable / Expressed in (converted to) reporting currency")	capital currency of the reporting entity
All amounts from taxonomies from V2.4.1 having in their context dimension CCA with value x1="Expressed in currency of denomination (not converted to reporting currency)"	corresponding currency of the amount

- one single audit status (for the codes, see chapters "Preliminary and final versions")
- one single Consolidation status (for the codes, see chapters "Reporting on an individual basis" and "Reporting on a consolidated basis")
- if applicable, one single sub-report type

3.1.3 No partial reports

In full alignment with the EBA approaches, CSSF does NOT allow reports with partial information. No update facility is offered, only complete reports containing the full set of data to be reported will be accepted (any new instance will completely replace all prior sendings of the same report)

3.1.4 Scheme and code

It is required that a LEI code issued by any of the endorsed (pre-)LOUs (Local Operating Units) of the Global Legal Entity Identifier System must be used by the reporting entities to identify themselves within XBRL instances⁸.

The list of endorsed (pre-)LOUs is available at:

<http://www.leiroc.org/>

A) Regarding branches – up to (including) EBA Filing rules 4.3 i.e. for any submissions or re-submissions remitted with reference period 2020-11 or earlier

Branches will normally be denied LEI-codes by the according LOUs because the system does not foresee that they are assigned LEI codes of their own. The following approach shall therefore be used for branches

- ***the CSSF file naming convention shall use the CSSF code of the branch***
- ***inside the XBRL instance, a single code is to be used, to be chosen among the following codes in descending order:***
 - a. ***a LEI code of the branch (NOT of the head-office!) if such an LEI code can be assigned to the branch (if it is a legal entity of its own)***

⁸ This is also a recommendation by the EBA :

<http://www.eba.europa.eu/-/eba-issues-recommendation-on-the-use-of-the-legal-entity-identifier-lei-for-supervisory-purposes>

- b. an official MFI code (if the branch is an MFI according to ECB standards)
- c. a CSSF entity ID code

The following schemes and code formats are to be used within the XBRL instance:

Order	Code	Scheme	Code format
1	LEI	http://standards.iso.org/iso/17442	Normal LEI code officially assigned
2	MFI	http://www.ecb.eu/stats/money/mfi	LUBnnnnn for banks resp. in general any official MFI code as published by the ECB
3	CSSF	http://www.ecb.europa.eu/suba_id	LUBnnnnn for banks LUPnnnnn for SFPs resp. in general <u>LUEnnnnn</u> as being composed of the constant string 'LU', an adequate CSSF entity type E (a capital character from A to Z) and nnnnn as a five digit CSSF entity code

CSSF will make sure that instances sent by branches that respect the above indications will not be rejected because of an EFR 2.8 error.

B) Regarding entities, branches and Liquidity Subgroups – from EBA Filing rules 4.4 i.e. for any submissions or re-submissions remitted with reference periods 2020-12 to 2022-11

This is the approach to use from the applicability of EBA Filing rules 4.4:

- the CSSF file naming convention shall use the CSSF code
- inside the XBRL instance, a single code is to be used as follows (in full accordance with EBA filing rules 4.4):

Order	Code	Scheme	Code format	Entity type
1	LEI	http://standards.iso.org/iso/17442	Normal LEI code officially assigned	Credit institution (no Branch)
2	MFI	http://www.ecb.eu/stats/money/mfi	LUBnnnnn for banks resp. in general any official MFI code as published by the ECB	Credit institution branch
3	LIQ	http://www.eba.europa.eu/eu/rs	<PARENT_LEI>.CRDLIQSUBGRP The LEI code of the sub group parent combined with constant string "CRDLIQSUBGRP" and separated by a dot	Liquidity Subgroup
4	CSSF	http://www.ecb.europa.eu/suba_id	LUBnnnnn for banks LUPnnnnn for SFPs resp. in general <u>LUEnnnnn</u> as being composed of the constant string 'LU', an adequate CSSF entity type E (a capital character from A to Z) and nnnnn as a five digit CSSF entity code	For future use or in case none of the above applies

CSSF will make sure that instances sent by branches or liquidity subgroups that respect the above indications will not be rejected because of an EFR 2.8 error.

C) Regarding entities, branches and Liquidity Subgroups – from Filing rules V5.1 updated by V5.2 i.e. for any submissions or re-submissions remitted for reference period 2022-12 or later

The EBA has decided to merge the respective CON and IND modules in all taxonomy versions from V3.2 into one single module respectively. The new consolidation approaches of the EBA, applicable from 2022-12 ff, are also described in EBA Filing rules document V5.2 with regards to rule 3.6.

See also:

https://www.eba.europa.eu/sites/default/documents/files/document_library/Risk%20Analysis%20and%20Data/Reporting%20Frameworks/Reporting%20framework%203.2/1037516/EBA%20Filing%20Rules%20v5.2.pdf

As a consequence and in accordance with the **updated naming convention** described in section 1.1 above in the present chapter 5, **all module codes for remittance to CSSF under V3.2 will change**, e.g. former modules

CFINRP
SFINRP

will need to be remitted to CSSF from V3.2 / as

FINREP

The distinction of the different consolidation versions of reports at filename level will continue to be made via the usual CSSF Accounting versions ('C', 'L', 'N', 'S').

With regards to the EBA Filing Rules document 5.2, CSSF plans to work as follows:

Applicable <Scheme> according To Filing Rules 5.2 (for LEI or MFI codes):

<https://eurofiling.info/eu/rs>

CSSF accounting code	Figures	<Identifier> in XBRL instance from 2022-12	Type of entity
'L'	Luxemburgish solo activities	<LEI-CODE>.IND	Standard supervised entity or branch using its own LEI-code
		<MFI-CODE>.IND	Branch using its MFI code
'S'	Solo Activities related to foreign branches	<LEI-CODE>.IND	Foreign branch using its own LEI-code
		<MFI-CODE>.IND	Foreign branch using its MFI code
'N'	Sum of 'L' and all 'S' figures	<LEI-CODE>.IND	Standard supervised entity using its own LEI-code
'C'	Consolidated figures	<LEI-CODE>.CON	Consolidated standard supervised entity
'C'	Liquidity Subgroup Figures	<LEI-CODE>.CRDLIQSUB GRP	Liquidity Subgroup

CAVEAT:

It is likely that NOT all of the V3.2 modules will go into production with reference period 2022-12, in which case the applicable modules of the prior taxonomy versions V3.0 resp. V3.1 would continue to be used. At this stage the following situation is expected according to the latest information received from the European Commission via the EBA:

V3.2 module	Expected V3.2 go-live (provisionally)	Modules to use in the transition phase from 2022-12 to the real V3.2 go-live of that module	<scheme> / LEI to use from 2022-12
AEXXXX	Postponed to 2023-06	Prior modules SAEXXX and CAEXXX (until real start of V3.2)	As defined in the present section from the go-live period defined in column 2 (unchanged during postponement for prior modules, see section 3.1.4b)
COREPX	Postponed to 2023-06	Prior modules CCOREP and SCOREP (until real start of V3.2)	As defined in the present section from the go-live period defined in column 2 (unchanged during postponement for prior modules, see section 3.1.4b)
ALMXXX	Postponed to 2023-06	Prior modules CALMXX and SALMXX (until real start of V3.2)	As defined in the present section from the go-live period defined in column 2 (unchanged during postponement for prior modules, see section 3.1.4b)
LAREXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
LCRDAX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
NSFRXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
FRTBXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
LEVERX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
FINREP	2022-12	Send V3.2 module from 2022-12	As defined in the present section
COVIDX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
FPXXXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
GSIIXX	Postponed to 2023-06	Prior module CGSIIX (until real start of V3.2)	As defined in the present section from the go-live period defined in column 2 (unchanged during postponement for prior modules, see section 3.1.4b)
NOTIMP	2022-12	Send V3.2 module from 2022-12	As defined in the present section
MRTLAX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
PSDFRP	2022-12	Send V3.2 module from 2022-12	As defined in the present section
REMXXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
REMHXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
RESOLX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
SBPCRXX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
SBPIF9	2022-12	Send V3.2 module from 2022-12	As defined in the present section
SBPRMX	2022-12	Send V3.2 module from 2022-12	As defined in the present section
SBPIMV	2022-12	Send V3.2 module from 2022-12	As defined in the present section

N.B.

- At file naming level, the merged module codes (e.g. V3.2 COREPX for both types of ind and con COREP content) do not permit anymore to identify the consolidation nature of the content of the XBRL file; the CSSF accounting code however still does ('L', 'N', 'S' for solo content, 'C' for consolidated entity or Liquidity Subgroup content.)

- The aggregation codes (.AUTALL/.MEMSTAAGGALL/.MEMSTAAGGCCRDREINS/.MEMSTAAGGINVFIR) defined by EBA Filing Rules V5.2 are reserved for inter-Authority communication and are **NOT** meant to be used by reporting entities.

- for **financial** reports, it should be evident when to use the .IND or the .CON EBA consolidation code in accordance with the applicable CSSF code 'C', 'N', 'L', 'S'. For **non-financial** reports, this is the presently known status of the according Supervision / Resolution / Investment Firm modules:

Module	How to send in XBRL (if applicable)
NOTIF_IMPRACTICABILITY	https://www.cssf.lu/en/Document/resolution-reporting-requirements/
MREL_DECISIONS	https://www.cssf.lu/en/Document/resolution-reporting-requirements/
PSD_FRP	not requested in XBRL by CSSF at this stage
REM	not requested in XBRL by CSSF at this stage
REM_HE	not requested in XBRL by CSSF at this stage
IF_GROUPTTEST	out of scope for credit institutions (consolidated nature of module) https://www.cssf.lu/en/Document/reporting-handbook-for-investment-firms/
IF_TM	out of scope for credit institutions (individual nature of module) https://www.cssf.lu/en/Document/reporting-handbook-for-investment-firms/

3.1.5 XBRL typed dimensions

Some reporting templates require “national codes” to be defined by the competent authorities; until a uniform European standard comes up in that area, the following codification shall be used:

Table	Dimension(s)	Name	Domain	Taxonomy	Format	Codification to be used
F_40.01 F_40.02 C_06.00	LEC	Legal entity code	LE	Finrep Corep	See ITS	See ITS instructions This should be a (Pre)LEI code, if a (Pre)LEI is not available, a different unique identifier shall be used
C_08.02 C_10.02	OGR	Obligor grade	ID	Corep	Up to 3 digits	0 – 999, in accordance with ITS instructions (see below *)
C_14.00	SRN	Securitisation row number	ID	Corep	Up to 4 digits	0 – 9999
F_40.02	STC	Security	SY	Finrep	See ITS	See ITS instructions

* Remark regarding dimension OGR: the CSSF does not require leading zeros. As a consequence, the values to be reported shall take the form of normal integer values: 0, 1, 2,..., 9, 10, 11, ... 99, 100, 101, ..., 999 (and not 001, 002, ... 999)

Table	Dimension(s)	Name	Domain	Taxonomy	Format	Codification to be used
C_27.00 C_28.00 C_30.00	INC	Individual client code	CC	Corep_LE	Maximum 60 characters	INC: group or individual code
C_29.00 C_31.00	GCC INC	Group client code Individual client code	CC CC	Corep_LE	Maximum 60 characters	GCC : group code INC : individual code

The characters used in the above codes are US ASCII codes (including digits), excluding the SPACE character.

In accordance with the instructions to the “large exposures” templates, **the above codes shall be used in a consistent way over time**, meaning that one specific client (or group of clients) shall have the same identifier (or group identifier) over all reporting periods. The consistent use of the client identifiers will allow for a cross-period analysis of the information reported, for one single client (or group of clients), in the “large exposures” templates.

3.1.6 Applicable rule deactivations & small taxonomy packages for reportings submitted to CSSF

On a regular basis, the EBA publishes an overview of validation rules in their taxonomies that shall be considered non-applicable resp. deactivated. The CSSF applies these non-applicable rules in short term to their own systems.

Since March 10th 2022, EBA has also started publishing updates of severities within their taxonomies; EBA calls these taxonomy updates “Small validation rules packages” located at

[Small validation rules packages | European Banking Authority \(europa.eu\)](https://www.eba.europa.eu/en/small-validation-rules-packages)

Information on when deactivated rule sets or new taxonomy rule severities become applicable can be found for CSSF systems under

<https://www.cssf.lu/en/document/deactivated-validation-rules-and-eba-small-validation-packages-cofrep/>

3.1.7 Use of the 00.01 table

Any instance sent to CSSF shall contain the according "00.01" filing indicator in accordance with the approaches determined by the EBA.

Depending on the situation applicable to the instance, the following should be used:

Values for line 010, Accounting framework:

eba_AS:x1 National GAAP
eba_AS:x2 IFRS

Values for line 020, Reporting Level

eba_SC:x6 Individual
eba_SC:x7 Consolidated

3.1.11 Reporting of unnecessary 0 values should be avoided

In accordance with Regulation (EU) No 2021/451, Art 21(1)(a):

"information that is not required or not applicable shall not be included in a data submission".

Credit institutions are invited not to unnecessarily generate 0 values for templates marked with **positive filing indicators** if they have no real data to report. Only in case they want to explicitly report a 0 value, the according value should be generated in the reporting file, otherwise it should simply not be reported. So it is unnecessary to generate systematically 0 values for reporting facts that are not used by the Bank or whose value is undetermined. An exception to this rule applies to a subset of publicly available ECB Expert Group on Data Quality (EGDQ) Checks:

[Additional supervisory data quality checks \(europa.eu\)](https://www.europa.eu)

EGDQ checks of type "Data point X should be reported. {r0yyy,c0xxx}{*} != empty" ensure that specific cells of the EU reporting framework are not empty. These are positions, interesting from the prudential point of view, for which the ECB requires an explicit 0 (referred to as "interesting zero") to ensure that the reporter did not make an oversight.

Remark: in case of **negative or absent filing indicators**, no values (including 0 values) must be generated as CSSF is likely to respond then with a EFR 1.7.1 error (see European Filing Rules document of the EBA, rule 1.7.1)

3.1.14 Precision of percentages and numeric data

Regarding precisions, CSSF accepts any numeric data in all precisions allowed by the EBA. So reporters can avoid errors with taxonomy-inherent rules ("Not implemented in XBRL"<>'y') sensitive to precisions by simply adapting the precision of their numeric data (amounts, percentages, ...) accordingly. (e.g. eba_v6206_m).

With regards to rules that are not implemented in XBRL taxonomies but internally at CSSF ("Not implemented in XBRL"='y'), CSSF uses standardly business percentages with 2 digits after the decimal comma (i.e. 4 digits in XBRL source files). This mechanism (together with adequate tolerances in some cases) is in general sufficient to make sure that validation rules implemented at CSSF do not generate any errors unless the data remitted by credit institutions are really erroneous. A few validation rules (particularly those using the multiplication operator, e.g. v0655 and v0656) may react very sensitively to the precision of percentages though. Therefore the precision of the following business percentages has been extended to 8 digits after the decimal comma (i.e. 10 digits in XBRL source files):

Taxonomies	Table	Y-Axis	X-Axis	Z-Axis
Corep_le_con, Corep_le_ind	C_26.00	030	010	n/a
Corep_le_con, Corep_le_ind	C_28.00	<INC>	230	n/a
Corep_le_con, Corep_le_ind	C_28.00	<INC>	350	n/a
Corep_le_con, Corep_le_ind	C_29.00	<INC>	240	n/a
Corep_le_con, Corep_le_ind	C_29.00	<INC>	360	n/a

Banks are encouraged to increase the precision of their data sufficiently to avoid errors on XBRL taxonomy-inherent rules ("Not implemented in XBRL"<>'y') and to also increase the precision of the percentages in the above table to avoid any undue precision-related errors

3.1.16 Correct recognition of capital currencies

There needs to be in all XBRL instances remitted to CSSF **at least one monetary fact referring to the unit (currency) that corresponds to the reporting entity's capital currency (as registered in the CSSF database).**

The mentioned fact must **not have the dimension CCA in its context** (i.e. the fact must refer for that dimension to the default value x0= "Not applicable / Expressed in (converted to) reporting currency").

Only under these circumstances CSSF can make sure to recognize the entity's reporting currency and successfully verify it against its internal databases.

Though unnecessary 0 values should be avoided in reports sent to CSSF (see section 3.1.11), in case a reporting entity does not have a single fact to report that corresponds to the above criteria (e.g. for a semi-annual resp. annual Corep containing IPLO/C_15.00 only), an **artificial fact with monetary value 0** should be forced in one of the corresponding data cells.

In case no fact as described above exists in a report received, CSSF will assume that the reporting entity uses the EUR, which, in case the entity uses a capital currency different from EUR. will lead to an error like

{R000001} The header record of the file indicates the following capital currency code [EUR]. This currency code is not the one referenced as capital currency for the entity code [B999].

3.1.21 Clarification on the EBA taxonomy versions applicable for March 2020

To clarify the according EBA publications with this regard, the following modules (both individual and consolidated) of the COREP Framework have to be sent to CSSF in EBA version 2.8.1 (publication date 2018-07-31) for 2020-03:

ALM
LCR (obsolete for credit institutions)
LCRDA
NSFR

All other modules (both individual and consolidated) of the COREP Framework have to be sent to CSSF in EBA version 2.9.1.1 (publication date 2019-11-15) for 2020-03:

OF (COREP)
LE (LAREX)
LR (LEVER)

From reporting period 2020-04, the entire COREP Framework with all modules switches to version 2.9.1.1. For remaining frameworks, please refer to EBA's reporting framework publication.

3.1.23 Enhanced COFFBX return files

Up to now, COFFBX return files from CSSF contained the following information:

- Table of contents (Sheet TOC)
- All data from the original XBRL file (Various data sheets)
- 4-5 Validation sheets describing Technical XBRL validation errors, Taxonomy business errors and European Filing rules errors

In the near future, these sheets will be completed in the COFFBX return files by information that were communicated in the past via e-mail by the CSSF GFD team:

- Sheet CSSF FEEDBACK

- Sheet containing errors related to specific local CSSF business checks (v_cssfxxx type of rules)
- Sheet ECB FEEDBACK (errors communicated to CSSF by the ECB regarding the original XBRL production file ; this information will not be delivered for files that are not shared with the ECB, e.g. reporting files from third country branches or TEST files ("T" and "X")):
 - COMP: Completeness check errors (filing indicators)
 - ECB: Business errors related to specific local ECB business checks, mainly ECB additional supervisory data quality checks (EGDQ checks)
 - non-XBRL: Business errors defined by the EBA, but NOT implemented in the XBRL taxonomies (as implemented by ECB)
 - SUBA: errors related to technical problems / the technical environment at the ECB

Once these messages are integrated in the COFFBX return files, the CSSF GFD team is not expected to intervene anymore in the systematic communication of errors to reporting entities, but only in the CSSF internal follow-up of reporting files (no more e-mails regarding the errors described above).

3.1.24 Regarding the introduction of data-type notEmptyString by the EBA data dictionary for version V3.2

With EBA version V3.2, a new possible data-type notEmptyString has been introduced by the corresponding data dictionary. It is used in a number of areas, e.g. for domains of dimensions which carry a key value that is not allowed to be empty-string, e.g. on z-dimensions. CSSF will support that EBA change and cease to accept null / empty-string values for dimensions that furthermore prohibit empty keys. In accordance with EBA approaches, CSSF will reject empty key values for all reports by applying the V3.2 data dictionary **to all historic and present EBA taxonomy versions from July 2022** on (thus including all reports sent for 2022-06 ff, but **also resubmissions for previous reference periods in their respective taxonomy version**). That change will thus need to apply to **all** EBA reports to be accepted by CSSF **from July 2022** (retroactive).

3.1.25 Regarding absent vs negative filing indicators described by EBA Filing rules document V5.1 rule 1.6

Up to 2022-11, not expected templates (i.e templates always not expected or Master data dependent not fulfilling conditions), templates sent outside normal frequency (e.g. C 06.01 in March) as well as FINREP templates reported on a voluntary basis could be marked as intended NOT to be reported by reporting entities simply by omitting the according filing indicator(s). With European Filing Rules V5.1 and particularly as formulated in its rule 1.6, any reported XBRL instance will furthermore need to include a **full set of all possible filing indicators** for the applicable module, each of them being either **positive or negative**.

CSSF will support that EBA change and cease to accept reports with incomplete sets of filing-indicators **from January 2023** for all reports (i.e. including for resubmissions).

3.1.26 Regarding <Identifier> consolidation codes .IND / .CON described by EBA Filing rules document V5.1 rule 3.6 as well as aggregation codes defined by the same rule in V5.2

This section is meanwhile redundant and obsolete, everything is described in ***chapter 5, section "3.1.4 Scheme and code", case "C) Regarding entities, branches and Liquidity Subgroups – from Filing rules V5.1 updated by V5.2 i.e. for any submissions or re-submissions remitted for reference period 2022-12 or later***

3.1.27 Subtyping of reports before and from EBA V3.2

Before EBA V3.2

- Reports SCOREP and CCOREP needed to have mandatorily sub-types 'S' (simplified) or 'I' (integrated)

- All other reports needed to have no subtype and be flagged '-'

With the arrival of EBA V3.2 for a reference period probably early 2023, CSSF will drop subtyping

- All reports will have no particular subtype and technically be flagged '-'

So technically the possibility to define subtypes will be preserved in the naming conventions for .zip and .xbrl files and 'I' resp. 'S' will remain applicable for SCOREP / CCOREP submissions and resubmissions for any EBA version V3.1 or earlier, but from V3.2 ALL reports will use subtype '-', including the merged COREPX module.

3.2 Reporting areas governed by national provisions

The requirements regarding XBRL instances for reporting areas covered by national provisions (CSSF circulars) have been specified in the respective schedule of conditions available at:

<https://www.cssf.lu/en/prudential-reporting-for-credit-institutions/>

As regards the electronic transmission of the long form report and the management letter, we would like to remind the instructions specified in the circular CSSF 10/457 and in particular:

"The long form reports received via electronic means must allow research, cross-sectional analyses and comparison over time. Their format must thus be compatible with the office tools used at the CSSF and not prevent reading access, printing and section (copy/paste). In order to fulfil these conditions, the file formats described in the Annex must be used. As far as the PDF files are concerned, it must be ensured that the options selected in the "save as" window authorise the actions described in the previous paragraph."

3.2.1 Information regarding the implementation of the new B2.4 according to circular CSSF 18/686

In the file "t-FINREP-lu-B24-2008-01-01-mapping.xls" documenting taxonomy "t-FINREP-lu-B24-2008-01-01.xsd" are described just as well the CSSF subtables, rows and columns (ID_SS_TABLEAU, ID_LIG, ID_COL) as well as the corresponding XBRL structures – see "doc" folder of

https://www.cssf.lu/wp-content/uploads/CSSF_FINREP_1.04.zip

t-FINREP-lu-B24-2008-01-01-mapping [Read-Only] [Compatibility Mode] - Excel

FINREP-Version 0.95-t-FINREP-lu

The old 2008 taxonomy could be technically re-used to allow remittance of B2.4 reports even in their IFRS9 version according to circular CSSF 18/686:

<https://www.cssf.lu/en/document/circular-cssf-18-686/>

Circular CSSF 18/686 gives on pp 6 / 7 the same (ID_SS_TABLEAU, ID_LIG, ID_COL) information together with the old content as well as the new content expected for the same (ID_SS_TABLEAU, ID_LIG, ID_COL) combinations:

Tableau B 2.4 A : Participations

Nom de la participation		Valeur comptable	Coût	Pourcentage d'investissement	Pourcentage des droits de vote	Montant déduit des fonds propres
		1	2	3	4	5
4.1	Actifs financiers détenus à des fins autres que de négociation obligatoirement évalués à la juste valeur par le biais du compte de résultat Actifs financiers désignés à la juste valeur par le biais du compte de résultat					
4.1.001	...					
4.1.002	...					
...	...					
4.2	Actifs financiers évalués à la juste valeur par le biais des autres éléments du résultat global Actifs financiers disponibles à la vente					
4.2.001	...					
4.2.002	...					
...	...					

Tableau B 2.4 B : Prêts subordonnés (y inclus les instruments de dette)

Nom de la contrepartie		Valeur comptable	Montant déduit des fonds propres
		1	2
4.1	Actifs financiers détenus à des fins de transaction Actifs financiers détenus à des fins de transaction		
4.1.001	...		
4.1.002	...		
...	...		
4.2	Actifs financiers détenus à des fins autres que de négociation obligatoirement évalués		

...

The codes of subtables, lines and columns and their associated XBRL structures (XBRL taxonomy codes and categories) will thus remain unchanged, but the entity data generated into the XBRL instances using the old XBRL structures must be furthermore adapted to reflect the new IFRS signification of those data cells, e.g. in B2.4 A lines of type "4.1.n" will no more have a content reflecting the former signification i.e.

Actifs financiers désignés à la juste valeur par le biais du compte de résultat

but the new one:

Actifs financiers détenus à des fins autres que de négociation obligatoirement évalués à la juste valeur par le biais du compte de résultat
